

Marine Grease WRAR

Product Description

PetroChina Lubricant Company's Marine Grease WRAR provides high performance anti-rust rope grease, and works well under a wide temperature range.

Applications

Suitable for lubricating wire rope during storage and run-up as well as preventing corrosion and rust under salt-spray and wet heat conditions. Its working temperature ranges between $-35\sim 60^{\circ}\text{C}$.

Features

- Excellent low temperature performance
- Excellent anti-corrosion and antirust performance
- Excellent adhesiveness

Storage and Handling

- It should be stored in a cool and dry place with temperature below 50°C . Prevent water and impurity from contaminating the grease. Normal oil separation is allowable, but it must be well mixed before using it. If after a long period of storage, and the oil separation is more than 5%, then the product has to be discarded.
- Before injecting grease, the equipment and container which is in contact with the grease must be cleaned thoroughly and to prevent it from being mixed with mechanical impurities, dust and particles. All mechanical parts should be cleaned thoroughly when changing to new grease. The volume/amount of usage is subject to each individual equipment or parts manufacturer's recommendation. For a better effect, it cannot be heated and mixed with other greases.
